

Category	TA Suggestions
GUI features (Frontend)	• User able to change output speed ◦ Slower output : Conceptual ◦ Faster output : Debugging • Have image upload • Have conversations saved • Like general UI of the interface • Want better LaTeX formatting for math equations (inconsistent)
Edison Model (Backend)	• Focus on training model on debugging questions ◦ ~70% of Ed posts are debugging • Has to be consistent • Students will switch only if the resource is more accurate and better than untrained LLMs
